## Set Theory

| eory |  |  |  |
| :---: | :---: | :---: | :---: |
| $\mathcal{A} \subset \mathcal{B}$ | $\mathcal{A}$ is a subset of $\mathcal{B}$ ie. if $a \in \mathcal{A}$, then $a \in \mathcal{B}$ also. | $\mathcal{A} \subseteq \mathcal{B}$ | $\mathcal{A}$ is a subset of $\mathcal{B}$, and possibly $\mathcal{A}=\mathcal{B}$. |
| $\mathcal{A} \sqcup \mathcal{B}$ | The disjoint union: $\mathcal{A} \sqcup \mathcal{B}=\mathcal{A} \cup \mathcal{B}$, with the assertion that $\mathcal{A} \cap \mathcal{B}=\emptyset$. | $\mathcal{A} \times \mathcal{B}$ | The Cartesian product of $\mathcal{A}$ and $\mathcal{B}$ : $\mathcal{A} \times \mathcal{B}=\{(a, b) ; a \in \mathcal{A} \& b \in \mathcal{B}\}$ |
| $\bigcup^{\infty} \mathcal{A}_{n}$ | $\mathcal{A}_{1} \cup \mathcal{A}_{2} \cup \mathcal{A}_{3} \cup \ldots$ | $\bigcap^{\infty} \mathcal{A}_{n}$ | $\mathcal{A}_{1} \cap \mathcal{A}_{2} \cap \mathcal{A}_{3} \cap \ldots$ |
| $\bigsqcup \mathcal{A}_{n}$ | $\mathcal{A}_{1} \sqcup \mathcal{A}_{2} \sqcup \mathcal{A}_{3} \sqcup$ | $\prod^{\infty} \mathcal{A}_{n}$ | $\mathcal{A}_{1} \times \mathcal{A}_{2} \times \mathcal{A}_{3} \times \ldots$ |
| ${ }^{n}{ }^{n} \boldsymbol{A} \backslash \mathcal{B}$ | The difference of $\mathcal{A}$ from $\mathcal{B}$ : $\mathcal{A} \backslash \mathcal{B}=\{a \in \mathcal{A} ; a \notin \mathcal{B}\}$ | ${ }^{n}{ }^{n} \triangle 1 \triangle \mathcal{B}$ | The symmetric difference: $\mathcal{A} \triangle \mathcal{B}=(\mathcal{A} \backslash \mathcal{B}) \sqcup(\mathcal{B} \backslash \mathcal{A})$ |
